

2002 Recipients of Amgen Award for Science Teaching Excellence Announced (Jefferson County, Kentucky)

April 22, 2002

THOUSAND OAKS, Calif., April 22, 2002 - Amgen (NASDAQ:AMGN), has announced the science teacher in Jefferson County, Kentucky, who is this year's recipient of the Amgen Award for Science Teaching Excellence. The Amgen awards honor public or private school science teachers, grades K-12, who demonstrate outstanding science teaching and have a great impact on the lives of their students. The teacher will receive an unrestricted \$10,000 cash award at an awards dinner in May.

The 2002 winner is:

- Patricia Hammer, of Holy Trinity Catholic School, in Louisville: (502) 897-2785

Nominations are made by submitting a form and/or letter to Amgen describing why the teacher should be recognized for science teaching expertise. Nomination forms were published in newspapers, posted on Amgen's web site, and press releases were widely distributed

A panel of three judges selected the winners. Judges based their decisions on evidence of the recipients' creativity and effectiveness in the classroom; their application and development of best practices in science education; their motivational ability; and their mastery of the subject matter and instructional skill.

In addition to the Jefferson County, Kentucky program, the Amgen Award for Teacher Excellence is granted in California; Boulder County, Colorado; and Juncos, Puerto Rico, locations where Amgen has facilities. For the last 10 years, Amgen has conducted regional awards programs for teaching, but this is the first year the awards have focused solely on science teaching.

Amgen is a global biotechnology company that discovers, develops, manufactures and markets cost-effective human therapeutics based on advances in cellular and molecular biology.
