

## **2003 Seattle-Area Recipients of Amgen Award for Science Teaching Excellence Announced**

May 5, 2003

FOR IMMEDIATE RELEASE

### **FOR IMMEDIATE RELEASE**

THOUSAND OAKS, Calif., May 5, 2003 - Amgen (NASDAQ:AMGN) the world's largest biotechnology company, has announced the two science teachers in King and Snohomish counties who are this year's recipients of the Amgen Award for Science Teaching Excellence. The Amgen awards honor public or private school science teachers, grades K-12, who demonstrate outstanding science teaching and have a great impact on the lives of their students. This is the first year that the Amgen Award has been given in Washington state. Each teacher will receive an unrestricted \$10,000 award at a dinner event in May. For more information about the award please call the teachers below or the Amgen contact. The 2003 winners are:

- Mary Glodowski, Juanita High School, Kirkland: (425) 823-7600
- Mary Margaret Welch, Mercer Island High School, Mercer Island: (206) 236-3350

Nominations are made by submitting a form and/or letter to Amgen describing why the teacher should be recognized for science teaching expertise. Nomination forms were published in newspapers, posted on Amgen's web site, and press releases were widely distributed.

A panel of three independent judges selected the winners. Judges based their decisions on evidence of the recipients' creativity and effectiveness in the classroom; their application and development of best practices in science education; their motivational ability; and their mastery of the subject matter and instructional skill.

### **2003 SEATTLE-AREA RECIPIENTS OF AMGEN AWARD**

#### **FOR SCIENCE TEACHING EXCELLENCE ANNOUNCED**

In addition to the Washington area program, the Amgen Award for Science Teaching Excellence is granted in California, Colorado, Kentucky, Puerto Rico and Rhode Island, locations where Amgen has facilities. Amgen has conducted the awards program for teaching excellence for 12 years. This is the second year the awards have focused solely on science teaching.

Amgen is a global biotechnology company that discovers, develops, manufactures and markets important human therapeutics based on advances in cellular and molecular biology.
