

## Amgen Announces Plans to Webcast Selected Management Presentations

May 3, 2005

THOUSAND OAKS, Calif.--(BUSINESS WIRE)--May 3, 2005--Amgen Inc. (NASDAQ:AMGN), the world's largest biotechnology company, today announced that it plans to webcast selected presentations regarding developments in Amgen's business given by management at certain investor and medical conferences. Information regarding presentation times and webcast availability will be noted in advance on Amgen's Investor Relations Calendar of Events at [www.amgen.com](http://www.amgen.com). The live webcasts for these presentations may be accessed via the same link on the Web site. Information on replays of the webcasts also will be available on Amgen's Investor Relations Calendar of Events.

Participation in these conferences is subject to change and Amgen may not webcast all presentations. Therefore, please check the company's calendar of events prior to each conference.

### About Amgen

Amgen is a global biotechnology company that discovers, develops, manufactures and markets important human therapeutics based on advances in cellular and molecular biology.

### Forward-Looking Statements

This news release contains forward-looking statements that involve significant risks and uncertainties, including those discussed below and others that can be found in our Form 10-K for the year ended December 31, 2004, and in our periodic reports on Form 10-Q and Form 8-K. Amgen is providing this information as of the date of this news release and does not undertake any obligation to update any forward-looking statements contained in this document as a result of new information, future events or otherwise.

No forward-looking statement can be guaranteed and actual results may differ materially from those we project. The Company's results may be affected by our ability to successfully market both new and existing products domestically and internationally, sales growth of recently launched products, difficulties or delays in manufacturing our products, and regulatory developments (domestic or foreign) involving current and future products and manufacturing facilities. In addition, sales of our products are affected by reimbursement policies imposed by first party payors, including governments, private insurance plans and managed care providers, and may be affected by domestic and international trends toward managed care and healthcare cost containment as well as possible US legislation affecting pharmaceutical pricing and reimbursement. Government regulations and reimbursement policies may affect the development, usage and pricing of our products. Furthermore, our research, testing, pricing, marketing and other operations are subject to extensive regulation by domestic and foreign government regulatory authorities. We, or others could identify side effects or manufacturing problems with our products after they are on the market. In addition, we compete with other companies with respect to some of our marketed products as well as for the discovery and development of new products. Discovery or identification of new product candidates cannot be guaranteed and movement from concept to product is uncertain; consequently, there can be no guarantee that any particular product candidate will be successful and become a commercial product. In addition, while we routinely obtain patents for our products and technology, the protection offered by our patents and patent applications may be challenged, invalidated or circumvented by our competitors. Further, some raw materials, medical devices, and component parts for our products are supplied by sole first party suppliers.
