Check the appropriate box to indicate the rule pursuant to which this form is being filed, and provide the period to which the information in this form applies:

Rule 13p-1 under the Securities Exchange Act (17 CFR 240.13p-1) for the reporting period from January 1 to December 31, 2015.

Section 1—Conflict Minerals Disclosure**Item 1.01 Conflict Minerals Disclosure and Report****Conflict Minerals Disclosure**

This Form SD is filed by Amgen Inc. (the “Company”) pursuant to Rule 13p-1 promulgated under the Securities Exchange Act of 1934 for the reporting period January 1, 2015, to December 31, 2015.

A copy of the Company’s Conflict Minerals Report is provided as Exhibit 1.01 to this Form SD, and has been posted on Amgen’s external website at <http://www.amgen.com/conflictmineralsreport>. References in this Form SD to the Company’s website are not intended to function as hyperlinks and the information contained on the Company’s website is not intended to be part of this Report.

Item 1.02 Exhibit

As specified in Section 2, Item 2.01 of this Form SD, the Company is hereby filing its Conflict Minerals Report as Exhibit 1.01 to this report.

Section 2—Exhibits**Item 2.01 Exhibits**

The following exhibit is filed as part of this report.

<u>Exhibit No</u>	<u>Description</u>
1.01	Conflict Minerals Report as required by Items 1.01 and 1.02 of this Form

SIGNATURES

Pursuant to the requirements of the Securities Exchange Act of 1934, the registrant has duly caused this report to be signed on its behalf by the duly authorized undersigned.

Date: May 31, 2016

AMGEN INC.

By: /s/ David W. Meline

Name: David W. Meline

Title: Executive Vice President and Chief Financial Officer

**Amgen Inc. Conflict Minerals Report
For the Year Ended December 31, 2015**

This Amgen Inc. Conflict Minerals Report (the “Report”) is prepared in response to Rule 13p-1 and Form SD (the “Rule”) promulgated by the Securities and Exchange Commission (“SEC”) under the Securities Exchange Act of 1934. The Rule imposes certain reporting obligations on SEC registrants who manufacture, or contract to manufacture, products for which certain specified minerals are necessary to the functionality or production of those products. These minerals consist of columbite-tantalite (coltan), cassiterite and wolframite (and their derivatives tantalum, tin, and tungsten), and gold (collectively, “Conflict Minerals”). The “Covered Countries” for the purposes of the Rule and this Report are the Democratic Republic of the Congo, the Republic of the Congo, the Central African Republic, South Sudan, Uganda, Rwanda, Burundi, Tanzania, Zambia and Angola.

This Report covers products manufactured or contracted to be manufactured by Amgen Inc. (including its subsidiaries, referred to as “Amgen,” “the Company,” “we,” “our” or “us”) from January 1 through December 31, 2015, for which Conflict Minerals are necessary to the functionality or production of those products.

References in this Report to Amgen’s website are not intended to function as hyperlinks and the information contained on Amgen’s website is not intended to be part of this Report.

Company and Product Overview

Amgen is a global biopharmaceutical company based in Thousand Oaks, California. Amgen is committed to unlocking the potential of biology for patients suffering from serious illnesses by discovering, developing, manufacturing and delivering innovative human therapeutics.

Amgen focuses on areas of high unmet medical need and leverages its expertise to strive for solutions that improve health outcomes and dramatically improve people’s lives. A biotechnology pioneer since 1980, Amgen has grown to be one of the world’s leading independent biotechnology companies, has reached millions of patients around the world and is developing a pipeline of medicines with breakaway potential.

Amgen has determined that the delivery device for one of its medicines (the “Product”) may contain Conflict Minerals that are necessary to the functionality or production of the Product. With respect to the Product, Amgen contracts for its manufacture with a single supplier (the “Supplier”). In turn, the Supplier contracts to have the Product manufactured by a single supplier (the “Sub-Supplier”), which is responsible for the sourcing of components and subassemblies used in the Product.

Reasonable Country of Origin Inquiry

Amgen is separated by many tiers in the supply chain from the smelters or refiners (“SORs”) of any minerals found in the Product. Consequently, Amgen worked through the Supplier to obtain information on the origin of any necessary Conflict Minerals contained in the Product.

As required by the Rule, Amgen conducted a reasonable country of origin inquiry into the necessary Conflict Minerals contained in the Product. As part of that inquiry, Amgen utilized the Conflict Minerals Reporting Template (“CMRT”) created by the Conflict-Free Sourcing Initiative (“CFSI”) to facilitate the transfer of information through the supply chain regarding Conflict Mineral country of origin and the SORs being utilized. CFSI is a cross-industry effort to facilitate the validation of SORs and their participation in CFSI’s Conflict-Free Smelter Program (the “CFSP”), which offers third-party audits of SORs to certify that the minerals they process originate from conflict-free sources. Amgen sent a copy of the CMRT to the Supplier for its completion with respect to the Product. The Supplier completed and returned the CMRT to Amgen.

Amgen reviewed the completed CMRT and engaged in follow-up inquiry with Supplier that resulted in Amgen determining that it had reason to believe that some of the necessary Conflict Minerals contained in the Product may

have originated in one or more of the Covered Countries and may not be from recycled or scrap sources. As required by the Rule, Amgen therefore conducted further due diligence on the source and chain of custody of the necessary Conflict Minerals contained in the Product, as described below.

Due Diligence Design and Performance

Due Diligence Design. Amgen’s due diligence measures were designed to conform in all material respects with the due-diligence-related steps of the *OECD Due Diligence Guidance for Responsible Supply Chains of Minerals from Conflict Affected and High Risk Areas: Second Edition* and the related Supplements (“OECD Guidance”). The OECD Guidance is an internationally recognized due diligence framework consisting of a multistep, risk-based process. Amgen is a “downstream company” within the meaning of the OECD Guidance; Amgen therefore designed its due diligence measures in a manner consistent with the OECD Guidance specifically applicable to downstream companies.

Amgen designed its due diligence measures to address the following areas:

- Step 1: Establish strong Company management systems;
- Step 2: Identify and assess risks in the supply chain;
- Step 3: Design and implement a strategy to respond to identified risks;
- Step 4: Carry out independent third-party audit of the supply chain due diligence at identified points in the supply chain; and
- Step 5: Report on supply chain due diligence.

Due Diligence Performance. Specific elements of Amgen’s due diligence measures performed in relation to its 2015 Conflict Minerals Report include the following:

Step 1: Establish strong Company management systems

- Amgen adopted a Conflict Minerals Policy, which is posted on Amgen’s external website at: <http://www.amgen.com/partners/suppliers/supplier-resources/conflict-minerals-policy>.
- Amgen expanded its Supplier Code of Conduct with specific requirements for suppliers to Amgen of products or materials containing Conflict Minerals, and posted it on Amgen’s external website at: <http://www.amgen.com/partners/suppliers/supplier-resources/supplier-code-of-conduct>.
- Amgen enhanced its Supplier Sustainability program with an implementation team with responsibilities that include Conflict Minerals compliance and internal and external reporting. Amgen also assembled a cross-functional team to address Conflict Minerals-related issues, which includes representatives from the following Amgen functions: Global Strategic Sourcing; Supply Chain; Environment, Health, Safety & Sustainability; Worldwide Compliance & Business Ethics; and Law.
- Amgen developed and implemented standard Conflict Minerals provisions into the terms of Amgen supplier contracts as new supplier arrangements were entered into and existing suppliers renewed their contracts.
- Amgen maintained a Business Conduct Hotline where individuals can raise matters of concern with the way Amgen is conducting its business, and provided on its website a direct email address through which suppliers and others can direct questions to Amgen’s Supplier Sustainability team about the Amgen Supplier Code of Conduct, including Conflict Minerals requirements.

Step 2: Identify and assess risks in the supply chain

- Amgen’s assessment of the risk in its supply chain was conducted primarily through Amgen’s review of the CMRT and related information provided by the Supplier and the evaluation of information about SORs provided by CFSI, including CFSI’s list of SORs that have been found by CFSI to be compliant with its CFSP protocols and listed on its website as conflict-free (“CFSP certified”).
- In connection with Amgen’s due diligence activities, the Supplier advised Amgen that, because all Product components and subassemblies were sourced by the Sub-Supplier, the Supplier had engaged the Sub-Supplier to determine the source and chain of custody of any necessary Conflict Minerals contained in the Product. Amgen confirmed with the Supplier that, as part of that process, the Sub-Supplier had contacted all of the suppliers of materials containing Conflict Minerals that were necessary to the functionality or production of the Product (the “Supplier Group”) and had requested that each such supplier complete a copy of the CMRT. The Supplier utilized the information provided by the Supplier Group in preparing the CMRT provided to Amgen.
- In evaluating the information provided by the Supplier, Amgen considered the fact that both the Supplier and the Sub-Supplier are SEC registrants subject to the Conflict Minerals reporting requirements of the Rule and that the Sub-Supplier is a current member of CFSI as well as a founding member of the Electronic Industry Citizenship Coalition (“EICC”), an industry group that joined with the Global e-Sustainability Initiative to create CFSI.

Step 3: Design and implement a strategy to respond to identified risks

- Amgen implemented a process for evaluating supplier violations of Amgen’s Conflict Minerals Policy and the Conflict Minerals provisions of Amgen’s Supplier Code of Conduct and determining follow-up actions, if any, to mitigate related risks. The process includes escalation to Amgen senior management when appropriate.
- Amgen also provided periodic updates to Amgen senior management regarding its Conflict Minerals due diligence results and reporting process.

Step 4: Carry out independent third-party audit of the supply chain due diligence at identified points in the supply chain

- As a downstream company in the supply chain, Amgen does not conduct audits of SORs. Amgen instead relies on the CFSP third-party audits of SOR due diligence practices and those of similar recognized assessment programs.

Step 5: Report on supply chain due diligence

- Amgen posted this Report on Amgen’s external website at <http://www.amgen.com/conflictmineralsreport>.

Results of Due Diligence

Information on Smelters or Refiners

As a downstream company in the supply chain, Amgen relies on the information provided by its Supplier to identify SORs that may have processed Conflict Minerals contained in the Product. The Supplier provided Amgen with a list of SORs that it had identified and validated against CFSI’s smelter reference list. The Supplier also advised Amgen that some suppliers in the Supplier Group provided incomplete information, and that some suppliers provided “company level” CMRT responses that include Conflict Mineral information for all products sold even though the Sub-Supplier may have purchased only a limited subset of such products from that supplier. Accordingly, Amgen cannot conclusively determine whether any materials obtained from these suppliers or processed by the identified SORs are actually contained in the Product.

Based on the information provided by the Supplier:

- 272 unique SORs were identified as potential sources of Conflict Minerals in the Product. These SORs are set forth in [Annex A](#).
- Of those 272 SORs, 22 SORs were identified by the Supplier as sourcing from one or more of the Covered Countries. Each of these 22 SORs is CFSP certified and is listed in [Annex B](#).
- Of the remaining 250 SORs not identified by the Supplier as sourcing from the Covered Countries, 210 are facilities that are CFSP certified or that are actively pursuing CFSP certification, and 3 facilities are members of the Tungsten Industry - Conflict Minerals Council (“TI-CMC”), an organization taking a harmonized approach to CFSP certification. The status of CFSP certification or TI-CMC membership is indicated in [Annex A](#).

Efforts to Determine the Country of Origin or Mine of Origin

In order to determine country or mine of origin, Amgen depends on information provided by its Supplier as well as information made available by CFSI. For its 2015 Conflict Minerals Report, Amgen did not receive sufficient information from the Supplier to conclusively determine the mines or the countries of origin of the Conflict Minerals in the Product or whether such Conflict Minerals are from recycled or scrap sources. However, as previously indicated, all 22 of the SORs identified by the Supplier as sourcing from the Covered Countries are CFSP certified.

On-going Risk Mitigation

Over time, Amgen will work to continuously improve its due diligence processes in an effort to reduce the risk of sourcing Conflict Minerals that may be funding armed conflict in the Covered Countries. Some of the anticipated risk mitigation approaches include:

- Strengthening Amgen’s engagement with its direct suppliers (including with new suppliers as new supply relationships are entered into) with regard to Amgen’s Conflict Minerals performance and reporting expectations.
- Working with Amgen’s current and future suppliers to increase transparency into the upstream Conflict Minerals supply chain and to encourage additional Conflict Mineral SORs to become CFSP certified or to participate in another internationally recognized SOR audit program.

ANNEX A

Smelter Reference List Name, Standard Smelter Name, Smelter Country and Smelter ID No. are as set forth on CFSI's smelter reference list

* indicates SOR is CFSI certified or actively pursuing certification

** indicates SOR is a member of the Tungsten Industry – Conflict Mineral Council (TI-CMC)
