#### Item 2.02 Results of Operations and Financial Condition.

On January 28, 2014, Amgen Inc. (the Company) issued a press release announcing its unaudited results of operations for the three and twelve months ended December 31, 2013 and its unaudited financial position as of December 31, 2013. The full text of the press release is set forth in Exhibit 99.1 attached hereto.

In its press release the Company included certain historical non-U.S. Generally Accepted Accounting Principles (non-GAAP) financial measures as defined in Regulation G promulgated by the Securities and Exchange Commission for the three and twelve months ended December 31, 2013 and 2012. Reconciliations for such historical non-GAAP financial measures are attached to the press release set forth as Exhibit 99.1 attached hereto. The Company believes that its presentation of historical non-GAAP financial measures provides useful supplementary information to and facilitates additional analysis by investors. These historical non-GAAP financial measures are in addition to, not a substitute for, or superior to, measures of financial performance prepared in accordance with U.S. Generally Accepted Accounting Principles (GAAP).

#### Three and twelve months ended December 31, 2013

For the three and/or twelve months ended December 31, 2013, the Company's adjustments to GAAP financial measures relate to amounts associated with:

For the three and/or twelve months ended December 31, 2012, the Company reported non-GAAP financial results for COS expense, R&D expense and SG&A expense:

- COS expense, R&D expense and SG&A expense were adjusted to exclude the effects of expensing stock options;
- COS expense was also adjusted to exclude the 2012 COS Acquisition-Related Expenses and the 2012 COS Cost-Savings Initiatives Expense;
- R&D expense was also adjusted to exclude the 2012 R&D Acquisition-Related Expenses and the 2012 R&D Cost-Savings Initiatives Expense;
- SG&A expense was also adjusted to exclude the 2012 SG&A Acquisition-Related Expenses; and

For the three and/or twelve months ended December 31, 2012, the Company reported non-GAAP adjusted operating expenses, adjusted provision for income taxes, adjusted net income and adjusted earnings per share excluding, where applicable:

- the foregoing COS, R&D and SG&A expense adjustment amounts;
- Contingent Consideration Costs;

- Non-Cash Interest Expense;
- 2012 Tax Effect;
- 2012 Income Tax Impact; and
- the related effects of expensing stock options on weighted average shares used in the calculation of adjusted diluted earnings per share.

The Company believes that excluding the non-cash amortization of intangible assets and developed product technology rights acquired in business combinations treats those assets as if the Company had developed them internally in the past, and thus provides a supplemental measure of profitability in which the Company's acquired intellectual property is treated in a comparable manner to its internally developed intellectual property. The Company believes that excluding all other adjustments described above provides supplemental measures of profitability that will facilitate comparisons before, at the time, and after such expenses are incurred.

For the three and twelve months ended December 31, 2013 and 2012, the Company reported Free Cash Flow (FCF) which is a non-GAAP financial measure. FCF is computed by subtracting capital expenditures from cash flow from operations, each as determined in accordance with GAAP. The Company believes that FCF provides a further measure of the Company's liquidity. The Company uses this measure internally and believes that providing FCF to investors facilitates additional analysis.

The Company uses the foregoing non-GAAP financial measures in connection with its own budgeting and financial planning.

Due to the differing treatments of expensing stock options for the purpose of presenting adjusted earnings per share within and across industries, the Company also reported non-GAAP adjusted earnings per share including the impact of expensing stock options for the three and twelve months ended December 31, 2013 and 2012, as a convenience to investors.

#### Operating Expense and Tax Rate Analysis, on an Adjusted Basis

- Cost of Sales margin decreased 0.8 points in the fourth quarter of 2013 and 0.6 points for the full year.
- **R&D** expenses increased 27 percent in the fourth quarter of 2013 and 19 percent for the full year, primarily in support of our later-stage clinical programs, including evolocumab (AMG 145) and Kyprolis.
- Selling, General & Administrative (SG&A) expenses decreased 3 percent in the fourth quarter of 2013 driven primarily by the end of the ENBREL profit share with Pfizer on Oct. 31, which reduced expenses \$129 million compared with the fourth quarter of 2012, offset partially by the addition of Onyx. For the full year, SG&A expenses increased 4 percent, driven primarily by the U.S. healthcare reform federal excise fee and the addition of Onyx.

**Tax Rates** for the fourth quarter and full year of 2013 reflect the favorable impacts of changes in the jurisdictional mix of income and expenses and the current year benefit from the federal R&D credit. The full year adjusted tax rate also benefited from the resolution of the Company's federal income tax audit for tax years 2007-2009 and the retroactive extension of the 2012 federal R&D credit in the first quarter of 2013.

#### 2014 Guidance

For the full year 2014, the Company expects:

- **Total revenues** to be in the range of \$19.2 billion to \$19.6 billion and **adjusted EPS** to be in the range of \$7.90 to \$8.20. This includes an \$800 million incremental operating income contribution due to the end of the ENBREL profit share.
- Adjusted tax rate to be in the range of 15 percent to 16 percent. This assumes the federal R&D credit will be extended for 2014 and also includes the impact of the foreign tax credit associated with the Puerto Rico excise tax. The Puerto Rico excise tax credit reduces the adjusted rate by three to four percentage points.
- **Capital expenditures** to be approximately \$800 million.

Further, some raw materials, medical devices and component parts for our products are supplied by sole third-party suppliers. Our efforts to integrate the operations of companies we have acquired may not be successful. Our business performance could affect or limit the ability of our Board of Directors to declare a dividend or our ability to pay a dividend or repurchase our common stock.

\* Dilutive securities used to compute "Adjusted" diluted EPS were computed assuming that we do not expense stock options.

(a) For the three months and year ended December 31, 2013, the total pre-tax expense for employee stock options was \$8 million and \$34 million, respectively, compared with \$13 million and \$59 million for the corresponding periods of the prior year.

"Adjusted" diluted EPS including the impact of stock option expense were as follows:

		Three months ended December 31,		ended ber 31,

(b) The adjustments related primarily to non-cash amortization of developed product technology rights acquired in business combinations, including \$176 million in 2013 related to Onyx.

- (c) For the three months ended December 31, 2013, the adjustments related primarily to charges associated with the Onyx business combination, which included the acceleration of Onyx unvested equity compensation (Onyx equity compensation). The three months and year ended December 31, 2013, also included adjustments related primarily to non-cash amortization of intangible assets acquired in prior year business combinations. The adjustments in 2012 related primarily to non-cash amortization of intangible assets as well as retention and severance expenses.
- (d) The adjustments in 2013 related primarily to the Onyx equity compensation. Both 2013 and 2012 included non-cash amortization of intangible assets acquired in prior year business combinations as well as business combination transaction costs.
- (e) The adjustments in 2012 related primarily to the write-off of a non-key intangible asset acquired in a prior year business combination.
- (f) The adjustments in 2013 and the three months ended December 31, 2012, related primarily to severance expenses. For the year ended December 31, 2012, the adjustments related primarily to severance expenses and lease abandonment costs.
- (g) The tax effect of the adjustments between our GAAP and "Adjusted" results takes into account the tax treatment and related tax rate(s) that apply to each adjustment in the applicable tax jurisdiction(s). Generally, this results in a tax impact at the U.S. marginal tax rate for certain adjustments, including the majority of amortization of intangible assets, whereas the tax impact of other adjustments, including stock option expense, depends on whether the amounts are deductible in the tax jurisdictions where the expenses are incurred or the asset is located and the applicable tax rate(s) in those jurisdictions. Due to these factors, the effective tax rates for the adjustments to our GAAP income before income taxes, for the three months and year ended December 31, 2013, were 39.3% and 33.0%, respectively, compared with 25.9% and 30.5% for the corresponding periods of the prior year.
- (h) For the three months ended December 31, 2013, the adjustments related primarily to certain prior period items excluded from adjusted earnings. For the year ended December 31, 2013, the adjustments related to resolving certain non-routine transfer-pricing and acquisition-related issues with tax authorities as well as the impact related to certain prior period items excluded from adjusted earnings. The adjustments in 2012 related to certain prior period items excluded from adjusted earnings.
- **Note:** The 2012 expenses related to amortization of certain acquired intangible assets within operating expenses have been reclassified to conform to the current year presentation.
